Security Policy Case Study: Impact of Turkey's Exit from NATO with Focus on NATO's Operations

2020

Produced a policy recommendations report on open-ended policy question in 4 people team

- Identified scope of research; Conducted preliminary research and data gathering
- Spearheaded analysis on early warning radar systems on their technical and political dimensions
- Recommended policy alternatives in a 30+ page report based on findings that show the loss of access to early warning radar system in Turkey led to a significant loss of early-warning capabilities for NATO's ballistic missile defense system without viable alternatives

Case Study: Quantitative Analysis on Chinese Arms Transfers and Political Stability in Africa

2020

Performed security policy research focused on statistical analysis and data visualization in a 4 people team

- Developed a research plan; Identified relevant datasets from open source repositories (SCAD, SAIS Johns Hopkins, Freedom House, Transparency International)
- Performed data cleaning, formatting, and merging of datasets in Excel and Rstudio; Conducted linear modeling, bivariate and multivariate regression analysis and produced data visualizations in Rstudio
- Concluded through research findings that showed Chinese Foreign Direct Investments, arms exports, and democracy ratings did not have significant relationships with political instability in Africa

Boeing Case Study: Business Strategy Analysis - Strategic Positioning of Boeing in Aviation Industry

2016

Performed strategic analysis on Boeing and the airline industry in a 3 people team

- Performed financial analysis and relevant industry research; Conducted SWOT analysis
- Recommended business strategy in a 15+ report that Boeing should target defense contracts and increase R&D in defense related technologies to gain a competitive edge over other aviation manufacturers.

Customer Relationship Management (CRM) Web Application Using Oracle APEX

2016

Developed a prototype CRM application with Oracle Apex in a 3 people team

- Designed website and entity relations wireframes using Lucidchart; Designed user experience based on customer journey and story map; Implemented designs in Oracle APEX
- Delivered live-demo of CRM prototype application as final deliverable
